Vergent Public API

Vergent Public API v1 OAS 3.0

<https://api-external.vergentlms.com/swagger/public/swagger.json>

Authorize

Application

GET

`/api/application/{applicationId}`
Gets an application (version 1) (Auth policies: DefaultApplicationAccess)

POST

`/api/application/{applicationId}`
Applies the set data points in the supplied application to a stored application entry (Auth policies: DefaultApplicationAccess)

GET

`/api/application/v2/{applicationId}`
Gets an application (version 2) (Auth policies: DefaultApplicationAccess)

POST

`/api/application/v2/{applicationId}` (Auth policies: DefaultApplicationAccess)

POST

`/api/application` Adds a new application entry

POST

`/api/application/v2/Create` Adds a new application entry for version 2

POST

`/api/application/{applicationId}/initialSubmit`
Performs the initial submission of an application (Auth policies: DefaultApplicationAccess)

POST

`/api/application/{applicationId}/preQualInitialSubmit`
Initial Pre-Qualification submit (Auth policies: DefaultApplicationAccess)

POST

`/api/application/{applicationId}/submit`
Submits an application (Auth policies: DefaultApplicationAccess)

POST /api/application/full_submit Submits a full application

POST

/api/application/{applicationId}/situate
Attempts to determine the store location to which the user's application should be assigned. If a valid store can be resolved with current information, this also updates the application and customer records as necessary. This should be called (1) at application creation (2) at address entry and (3) at store selection, at minimum. (Auth policies: DefaultApplicationAccess)

POST

/api/application/{applicationId}/withdraw
Withdraws an application (Auth policies: DefaultApplicationAccess)

ApplicationCustomer

POST

/api/application/{applicationId}/customer/register Attempts to register a new user

POST

/api/application/{applicationId}/customer/sync
Synchronizes application data to the related customer record. (Auth policies: DefaultApplicationAccess)

GET

/api/application/{applicationId}/customer/Id
(Auth policies: AttachedApplicationAccess)

GET

/api/application/{applicationId}/customer/ConsentsAndDisclosures
(Auth policies: DefaultApplicationAccess)

ApplicationDecision

POST

/api/application/{applicationId}/decision/prequalification
Gets a prequalification decision for a given application. (Auth policies: DefaultApplicationAccess)

POST

/api/application/{applicationId}/decision/full
Gets a prequalification decision for a given application. (Auth policies: AttachedApplicationAccess)

ApplicationDocuments

GET

/api/application/{applicationId}/documents/loan_agreements
Gets loan agreement documents for submitted applications that are attached to a loan (Auth policies: DefaultApplicationAccess)

GET

/api/application/{applicationId}/documents/all
Gets loan model documents related to an application (Auth policies: DefaultApplicationAccess)

POST

`/api/application/{applicationId}/documents/signing/save`
Save signing data for a given application (Auth policies: DefaultApplicationAccess)

**POST**

`/api/application/{applicationId}/documents/print_chain/{printChainItemId}/download`
Get a url to download a filled print chain item (Auth policies: DefaultApplicationAccess)

ApplicationLead

**GET**

`/api/application/{applicationId}/lead/status`
Retrieves the application status details for Lead Sherpa

ApplicationLoanModel

**POST**

`/api/application/{applicationId}/loan_models`
Gets details about loan models available to an application. (Auth policies: DefaultApplicationAccess)

**GET**

`/api/application/{applicationId}/loan_models/Amounts`
(Auth policies: DefaultApplicationAccess)

**GET**

`/api/application/{applicationId}/loan_models/{loanModelId}/Amounts`
(Auth policies: DefaultApplicationAccess)

**GET**

`/api/application/{applicationId}/loan_models/{loanModelId}/Amounts/{amount}/FundingMethods/{fundingMethod}/Values`
(Auth policies: DefaultApplicationAccess)

**GET**

`/api/application/{applicationId}/loan_models/AvailableValues`
(Auth policies: DefaultApplicationAccess)

Authentication

**POST**

`/api/authenticate` Authenticates Users using Vergent LMS Database

ChirpExternal

**POST**

`/api/ChirpExternal/GetLoanBankAccountNumber` Gets the Loan Bank Account Number.

**POST**

`/api/ChirpExternal/CheckForDepositNotificationEligibleLoans`
Determines if loan associated with deposit is eligible for past due payment.

Communication

POST

[/api/Communication/RequestPinByText](#)

Requests a pin to be sent to a phone number on behalf of a company.

POST

[/api/Communication/VerifyPin](#)

Attempts to verify a pin sent to a phone number on behalf of a company.

POST

[/api/Communication/omniatext](#)

Handles incoming requests from OmniaText for 2 way messaging, mms messaging, and stop messages.

Customer

GET

[/api/customer/{customerId}/status](#)

Gets the status of the customer presented by authentication

CustomerContact

GET

[/api/CustomerContact/appointmenttoday/{loanModelId}/{numberOfRecords}](#) (Auth)

CustomerLoan

GET

[/api/Customer/{customerGuid}/Loan/{loanId}](#)

Gets an individual loan details by id. (Auth)

GET

[/api/Customer/{customerGuid}/Loan/Transaction/{transId}](#)

Gets the loan transaction details. (Auth)

CustomerPasswordReset

GET

[/api/Customer/PasswordReset/Search/{userNameOrEmail}](#)

Searches for Customer based on email/username to begin the password reset process flow. The guid token returned is to be used by all steps/pages throughout the process flow.

GET

[/api/Customer/PasswordReset/RecoveryOptions/{resetToken}](#)

For a given password reset guid token, provides the Vergent.Lms.Api.CustomerPortal.Domain.Models.PasswordRecoveryOptionsResponseModel to determine which options (other than questions) are available to reset a user's password.

GET

[/api/Customer/PasswordReset/Question/{resetToken}](#)

Gets random security question for customer.

POST

[/api/Customer/PasswordReset/Question/{resetToken}/{questionId}/ValidateAnswer](#)

Validates an answer to identify verification question for a password reset

POST

`/api/Customer/PasswordReset/SendResetText/{resetToken}`
Sends a pin via text message through Solutions By Text

**POST**

`/api/Customer/PasswordReset/SendResetEmail/{resetToken}`
Based on a reset token, will find the associated user/customer and send them an email with a link to reset their password. The link will be comprised of the `verificationPageUrl` plus a 'key' query string parameter with a guid string value.

**POST**

`/api/Customer/PasswordReset/NewPassword/{resetToken}`
Updates a user's password. The reset token must be valid and the user's identity must have been verified via one of the available processes (ie - question answers, email, text, etc)

**GET**

`/api/Customer/PasswordReset/CheckVerification/{resetToken}`
Determines if the user associated to the reset token provided has finished one of the identity verification processes (ie - question answers, email, text, etc).

**GET**

`/api/Customer/PasswordReset/VerifyResetEmail/{emailToken}`
Determines if the email guid token (from the link included in a password reset email) is associated with a valid reset token and if so marks the user as having finished the identity verification process

**GET**

`/api/Customer/PasswordReset/Text/{resetToken}/VerifyCode/{textPin}`
Verifies a pin entered by user during password reset.

CustomerPhones

**GET**

`/api/Customer/Phones/Get` Gets customer phones based on customer id. (Auth)

**GET**

`/api/Customer/Phones/GetPhoneDetailByPhoneNumber/{phoneNumber}`
Gets an array of phone details with the given phone number. (Auth)

**POST**

`/api/Customer/Phones/Save` Saves a customer's phone. (Auth)

**POST**

`/api/Customer/Phones/modify` Modifies a customer's phone. (Auth)

**POST**

`/api/Customer/Phones/Delete` Deletes a customer's phone. (Auth)

CustomerPortalApplication

**POST**

`/api/CustomerPortal/Application` Creates a new loan application from customer portal

**GET**

`/api/CustomerPortal/Application` (Auth)

CustomerPortalAuthentication

POST /api/CustomerPortal/Authenticate Exchange credentials for a security token

POST /api/CustomerPortal/AuthenticateCognito
Exchange a Cognito JWT for a Customer Portal security token

CustomerPortalCompany

GET /api/CustomerPortal/Company/IncomeTypes

GET /api/CustomerPortal/Company/PayFrequencies

GET /api/CustomerPortal/Company/PayFrequencies/{payFrequencyId}/Matches/{payDate}

GET /api/CustomerPortal/Company/Stores/Search
Searches for stores by city and state or zip for a user's company

CustomerPortalCustomer

GET /api/CustomerPortal/Customer/Documents Gets customer profile documents. (Auth)

GET /api/CustomerPortal/Customer/Documents/{documentId}/Url
Gets customer profile document url. (Auth)

GET /api/CustomerPortal/Customer/Profile Gets a customer's profile. (Auth)

POST /api/CustomerPortal/Customer/Search Searches for matching customers.

GET /api/CustomerPortal/Customer/SearchByEmail/{email}
Searches for Customer mobile profile id based on email.

POST /api/CustomerPortal/Customer/Register Attempts to register a new user

POST /api/CustomerPortal/Customer/Address/Save
Adds a customer address and if it is primary, all others are set secondary. (Auth)

GET /api/CustomerPortal/Customer/UserName/{userName}/IsValidAndAvailable
Attempts to check the availability and validity of a given username.

POST /api/CustomerPortal/Customer/Register/SecurityQuestions
Updates Customer questions and answers. (Auth)

GET	/api/CustomerPortal/Customer/Banks/{routingNumber}/Name Gets a bank name from a routing number.	✓
GET	/api/CustomerPortal/Customer/Documents/Requests Gets document requests. (Auth)	✓
POST	/api/CustomerPortal/Customer/Documents/Requests/{documentRequestId} Uploads a document. (Auth)	✓
GET	/api/CustomerPortal/Customer/Addresses Gets Customer Addresses. (Auth)	✓
GET	/api/CustomerPortal/Customer/Cards Gets Customer Credit Cards. (Auth)	✓

CustomerPortalPayment

POST	/api/CustomerPortal/Customer/Cards Posts the customer card asynchronous. (Auth)	✓
POST	/api/CustomerPortal/Loans/Payments/CreditCardPayment Posts the loan credit card payment asynchronous. (Auth)	✓

CustomerPortalDocument

GET	/Customer/Documents/eSign Gets the documents needing signature for current user (Auth)	✓
GET	/Customer/Loans/{loanId}/Documents/eSign Gets the documents needing signature for current user (Auth)	✓
GET	/Customer/Documents/DecisionLetter Gets the latest decision document for the current user (Auth)	✓
POST	/Customer/Documents/CustomerPhoto Preps, uploads, and sets a customer photo. Accepts a multipart image as a POST. (Auth)	✓

CustomerPortalLoan

GET	/api/CustomerPortal/Customer/Loans/Full (Auth)	✓
GET	/api/CustomerPortal/Loans Gets the open loans for the current user (Auth)	✓
POST	/api/CustomerPortal/Loan/Originate Originates a loan using the legacy WebAPIV1 (Auth)	✓

GET	/api/CustomerPortal/Loans/{loanId}/Transactions Gets the loan transaction history asynchronous. (Auth)	 
GET	/api/CustomerPortal/Loans/{loanId}/Documents/ContractsAndReceipts Gets the contracts and receipts for a given loan (Auth)	 
GET	/api/CustomerPortal/Loans/{loanId}/documents/{transactionId}/{printChainId} Gets the specific contract or receipt for a given loan (Auth)	 
GET	/api/CustomerPortal/Loans/LocDrawRequest/{loanId}/{drawAmt}/{accountId} /{accountType} Submit a draw request for a Line of Credit (Auth)	 
GET	/api/CustomerPortal/Loans/{loanId}/Source/{source}/PaymentSchedule Gets the loan transaction history asynchronous. (Auth)	 

CustomerPortalOptions

GET	/api/CustomerPortal/Options/Classes Gets the opt class list asynchronous.	
GET	/api/CustomerPortal/Options/Classes/{classId}/Items Gets the option item list by class asynchronous.	

CustomField

POST	/asset/import Endpoint to post Loan Asset(s) custom field imports. (Auth)	 
------	--	---

Dealertrack

POST	/api/DealerTrack/dealertrack/application/{dealerCode} Post an application via XML from dealertrack	
------	---	---

DialerCustomer

GET	/api/Dialer/CICCollectionsCustomerList Retrieves customer information for active loans in central collections (Auth)	 
-----	---	---

Handoff

POST	/api/authenticate/handoff/create Creates a handoff token that can be used pass authentication between systems (Auth)	 
------	---	---

OmniaVerify

POST

/api/OmniaVerify/UpdateAnalysis

Requests a pin to be sent to a phone number on behalf of a company.

⌵

Products

⌵

GET

/api/system/products

Gets urls for products related to the requesting application.

⌵

SystemState

⌵

GET

/api/System/States

Gets all states defined in the system. (Auth)

🔒

⌵

User

⌵

POST

/api/user/expire

Sets a user's JWT to a blacklist to ensure that it can no longer be used. (Auth)

🔒

⌵

Schemas

⌵
